

DeployNow

Fully Managed Enterprise Grade ArgoCD

ArgoCD is a declarative GitOps based continuous delivery (CD) tool for Kubernetes. It ensures the state of an application is in-sync with its declared state in Git. Combined with the Argo Rollouts tool, ArgoCD provides a comprehensive set of features to manage modern application delivery to Kubernetes. OpsVerse DeployNow is a fully managed ArgoCD service.

WHY ARGOCOCD

AUTOMATED CD FOR K8S

Automate deployment into multiple Kubernetes clusters without any additional tooling

GITOPS BASED CD

Extend the advantages of Git to deployments using ArgoCD. Know who changed what and when.

MODERN ROLLOUT STRATEGIES

ArgoCD combined with Argo Rollouts supports advanced deployment strategies like blue-green and canary deployments out-of-the-box

INTUITIVE UI

Easy-to-use UI that provides full visibility into production workloads. Combined with RBAC the UI enables safe self serve options for developers to access production.

DRIFT DETECTION

Detect drift in deployments and auto heal drifts to ensure consistent application state

ROLE BASED ACCESS CONTROL

Configure fine grained role based access controls to specific projects and clusters.

Fully managed ArgoCD in any cloud, region or as Private SaaS

GitOps for Kubernetes in minutes with fully managed ArgoCD

Blue-green deployments, canary deployments

RBAC and SSO support

THE OPSVERSE™ ADVANTAGE

PRIVATE SAAS

Run OpsVerse tools as Private SaaS in your cloud. Private SaaS ensures no data leaves your secure infrastructure and conforms to the strictest compliance requirements

ANY CLOUD, ANY REGION

Choose to run OpsVerse tools in our cloud with absolutely no resources required from you. Moreover choose from any public cloud in any region to meet your requirements

READY IN 5 MINUTES

OpsVerse's control plane enables deployment of enterprise grade tools within 5 minutes to any cloud of your choice

ENTERPRISE SUPPORT

Receive enterprise grade support with OpsVerse from DevOps experts at OpsVerse

REDUCE TCO

Run your DevOps tools with significantly low TCO. Optimize data with data compression and data filtering. Run with no dedicated resources

SIMPLE PRICING

Simple and predictable pricing that includes all the features the product has to offer. No surprises when you grow. Get maximum value for every dollar spent

FULLY MANAGED

Managing ArgoCD is not easy. It requires a team and resources to deploy and manage. With managed ArgoCD from OpsVerse, your ArgoCD is just a click away and is fully managed by OpsVerse with enterprise-grade features and support.
